

Let's Learn LaTeX!

Name: **Griffin Colasanti**

1. Go to Overleaf and create an account.
2. Create a new document. Find the LaTeX code on our Moodle page under the *Homework* tab. Copy and paste the provided LaTeX code into the new document.
3. Now that you have your own document, answer the following questions below. Notice that when you are writing math, you use \$\$ signs.

a) What is your favorite color? Mine is purple!

Ans: blue!

b) What is $2^3 + (4x)(2x)$?

Ans: $8 + 8x^2$

c) Fractions are fun, too! Try to evaluate

$$\frac{2x^3 + 2h}{h}.$$

Ans: $2x^3 \frac{1}{h+2}$

d) What is your favorite number x such that $x \notin \mathbb{Q}$ but $x \in \mathbb{R}$? Obviously, it cannot be $\sqrt{17}$, though.

Ans: π

e) Math pop quiz! What mathematician is *Galois Theory* named after?

Ans: Évariste Galois

4. Great work! Recompile the page by hitting the green recompile button at the top. Download the PDF and upload it to Homework 0 on Moodle. Note: Your name is (most likely) not Max Cartor. Be sure to change that!
